# ACE SECURE SLIDE

**SAFE & SECURE PROTECTION FOR SLIDING DOORS**

## FEATURES

### SECURE CLOSING OF SLIDING DOORS

Ace Secure Slide provides an easy, cost effective method of ensuring sliding doors are closed securely, ensuring building security and occupant safety.

### EASY INSTALLATION GUIDE

The Ace Secure Slide comes with clear, simple to follow installation instructions geared to the DIY enthusiast or handyman.

The Ace Secure Slide is suited to both left or right handed doors.

### POOL SAFETY

The Ace Secure Slide may in some instances be used on sliding doors to pools. Suitability is dependent on local council legislation and locking requirements.

### DUAL SPEED ADJUSTMENT

The Ace Secure Slide comes with both door speed and latch speed adjustment ensuring full functional control of the door closing operation.

### BACK CHECK FUNCTION

Ace Secure Slide door closers are equipped with a reverse hydraulics feature (back check) to prevent damage to the door or its surrounds, by the door being pushed open in an uncontrolled manner.

### 2 YEAR MANUFACTURERS WARRANTY

Ace Secure Slide is Australian made, using commercial grade heavy duty hydraulic closers and custom manufactured components.

## ENHANCED FEATURES

The following enhanced features are available on the Ace Secure Slide 6 series:

### DELAYED ACTION

The Ace Secure Slide 6 Series closers have a feature that enables closing of the door to be delayed by up to 60 seconds after the door has been fully opened.

This feature is ideally suited to disabled access applications.

### ADJUSTABLE STRENGTH

The Ace Secure Slide 6 series features adjustable closer strength, providing the ability to vary the closing force applied to the door, offering greater flexibility in setting the correct closer strength to suit the application.

### APPLICATIONS

The Ace Secure Slide is suitable to be used on both timber or aluminum sliding doors, with an opening of up to 1100mm

The Ace Secure Slide is also suitable to be used on cavity sliding doors.
